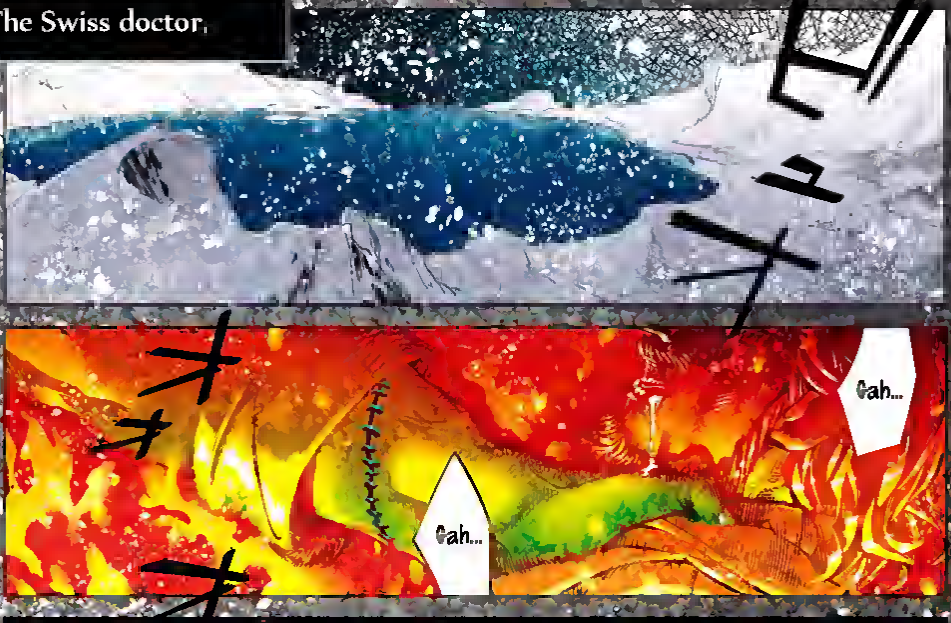
The Swiss doctor,



Victor Frankenstein,
sought after the forbidden and finally
created the invention of the century.

Artificial Human

It's sink-ing!
It keeps sinking!!
The research had disappeared into the darkness...
It was a body brought back to life which was created using several other bodies.
However, Victor was killed by the only artificial human he had created.

Or
so it
should
have.

第1話
Approximately 80 years later.
1878 India
... Bwaa.
ドギドギ
ニヤ
Haa... I feel like going for a swim.

Right, Friday.
Hm?
プカァ

Friday,
"Pull this man up."

Did you see that? Just now...
That's some insane strength! Is it a new model?
...Friday,
Approx-imately 48 hours since death.
No external injuries.
invest-igate.
India
Ganges
Dead body

Right, Friday.
What a waste. Even dead bodies can be put to good use nowadays.
I see, so it's a type of water burial.
ファイア

Keep moving! Shit.
Don't dilly dally!
Hah
Hah
Hah

……

Please give it back.
My corpse.
Hey, boys.
We picked it up.
If you say it's yours, then you should have kept a leash on it.
Just like a dog, arf arf! Arf arf!!
Aaroo!!

イヤッ

Give us all the money you got, then we can trade!!
Here's the deal!

スッ

Guess there's no other choice.
カチャ

Get lost.
He is mine.

The place should be open but...
I don't like this. He's really lax with time.
フゥミ
You're late, idiot!

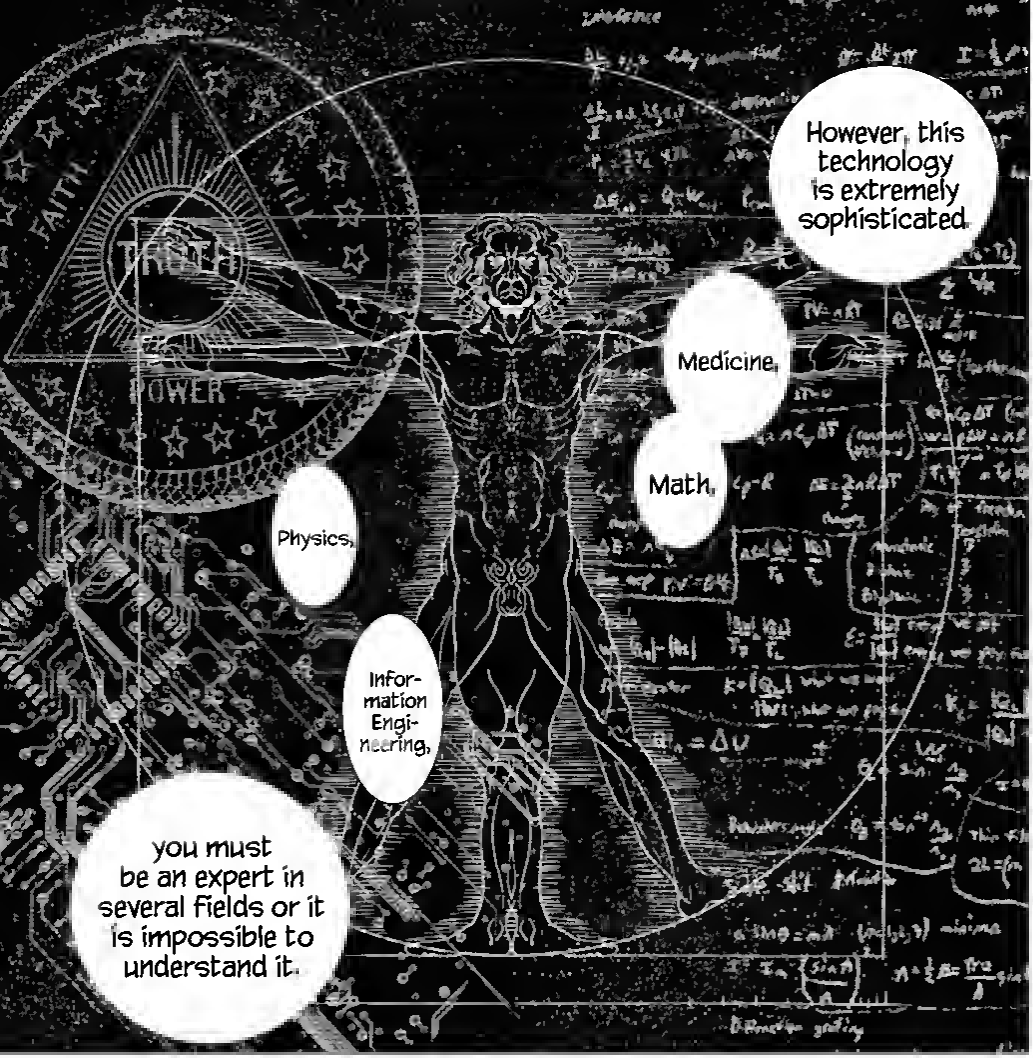
Ugh.
You piece of junk! C'mon, c'mon.
This guy is trying to get up even with a broken leg.
If it's going to be like this, then hiring a living guy would be better, damn...
A used one won't do, huh?

ゴッ
.....
Is that also an old model from the South-North War? Jeez...
Can't they at least renew it?
Judging from its movements, its version is most likely...

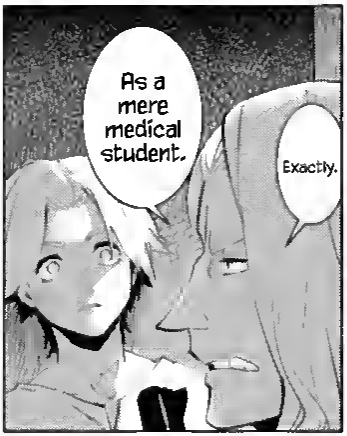
Two months ago. London
Mr. Watson... was it?
You surprised me.
カチャ
カチャ
ニュー
コポ
コポ

Combining a corpse-controlling engine with language broadening.
You are utilizing the latest Necroware perfectly.
No wonder you ranked second in your class.
カチャ
カチ
Above: Stop!!!

Know your place.
John Watson, you felon.
Don't shoot him, Hellsing.
I don't have any interest in piling up this kind of trash and creating corpses.
Just stop insulting the kid and
explain it to him.
80 years ago, we, the Atlantic Scouting Company, met Professor Frankenstein and
obtained a treasure for humanity
"The re-creation of life"
...A Corpse Controlling Technology



However, this technology is extremely sophisticated.
Medicine,
Math,
Physics,
Information Engineering,
you must be an expert in several fields or it is impossible to understand it.



As a mere medical student.
Exactly.

However!
You created a corpse just by yourself!!

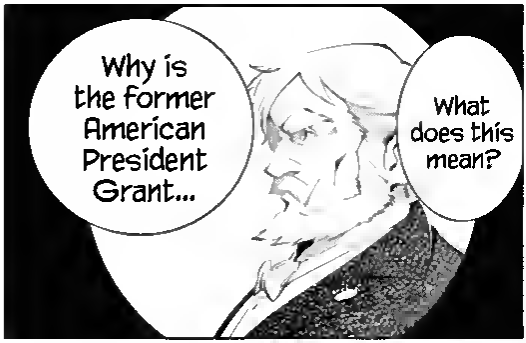
Illegal installing of Necroware
Stealing a dead body.
Individually analyzing ghostium
Resurrecting a corpse without a license
Therefore ...
You're a dangerous person.
All the crimes you have committed are felonies with a punishment of over 10 years of imprisonment.

Curio-sity
Know-ledge
Cour-age
It means you are a young man with all of that.
I hereby declare that you have passed.
...Eh?
I am M.
This is Abraham Van Hellsing.
We are with the intelligence agency, "Walsingham."

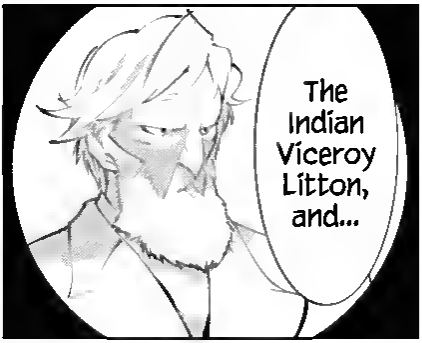
Would you like to make a deal?
Future...
In exchange for overlooking your crimes,
offer us yourself and your future.
I need to move on.

No matter how difficult it gets,
I must succeed in reviving Friday's soul...

And if you are lucky, then during this journey,
You will conduct intelligence analysis in the Russian Empire.
I will need you to work for our Great British Empire.
you may come closer to the truth of Corpse Controlling Technology.
!
That is...



Why is the former American President Grant...
What does this mean?



The Indian Viceroy Litton, and...

I see!
Search-ing
American President
Grant
Grant is currently working as the Civilian Militia Pincarton's advisor.
He must be selling upgraded corpses from the South-North war.

...Our eyes
mei?
!!
Even from this distance !?

that woman ...
ギッ
Just who is she!?
Friday,
look up
!!

ゴゥ
A corpse bomb.
It acts as a walking bomb and uses the corpse's body fat to charge up.
……

Those Russians... such horrifying things they make.
Aah, how horrifying.
If Captain hadn't been late, I wouldn't have been attacked!
I was cool, wasn't I? Be thankful.
You're... you're late!
Captain Fredrick Barnabie !?

Hadari,
let's move to a safer place.
...What's wrong?
Things are starting to get interesting.

I don't know. My job is to guide you.
It's pretty festive over there too.
Let's get out of here.
What about the Viceroy!?
Whoops

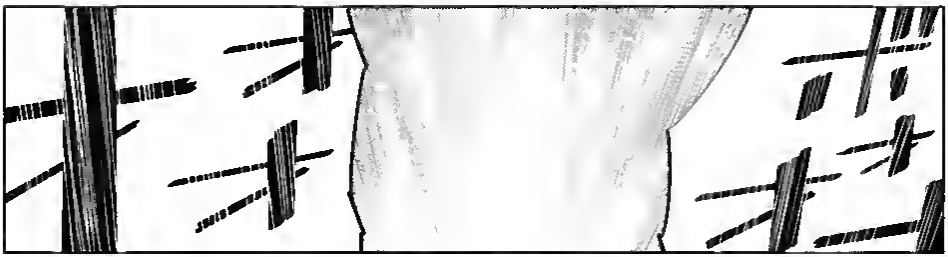
This is gonna be fun!!
More of them!
Haha!

ドガァ
Left:
Oooh-
hhhhh

チャッ
ドドド

ドサッ

ゴリ



You foolish idiot.
"You foolish idiot"
You're a lucky bastard, only getting slightly injured even though you got caught in the explosion.
You don't need to worry about me.
I am a medical student. I can treat my injuries myself.

"I have to travel with a messed-up corpse maniac"... What the heck?
I'm implement-ing in a Secretary Software.
I might need to put in a combat one too...
Worry? I'm not worried! I'm angry that
I have to travel with a messed-up corpse maniac who'd act as a shield for dead bodies!

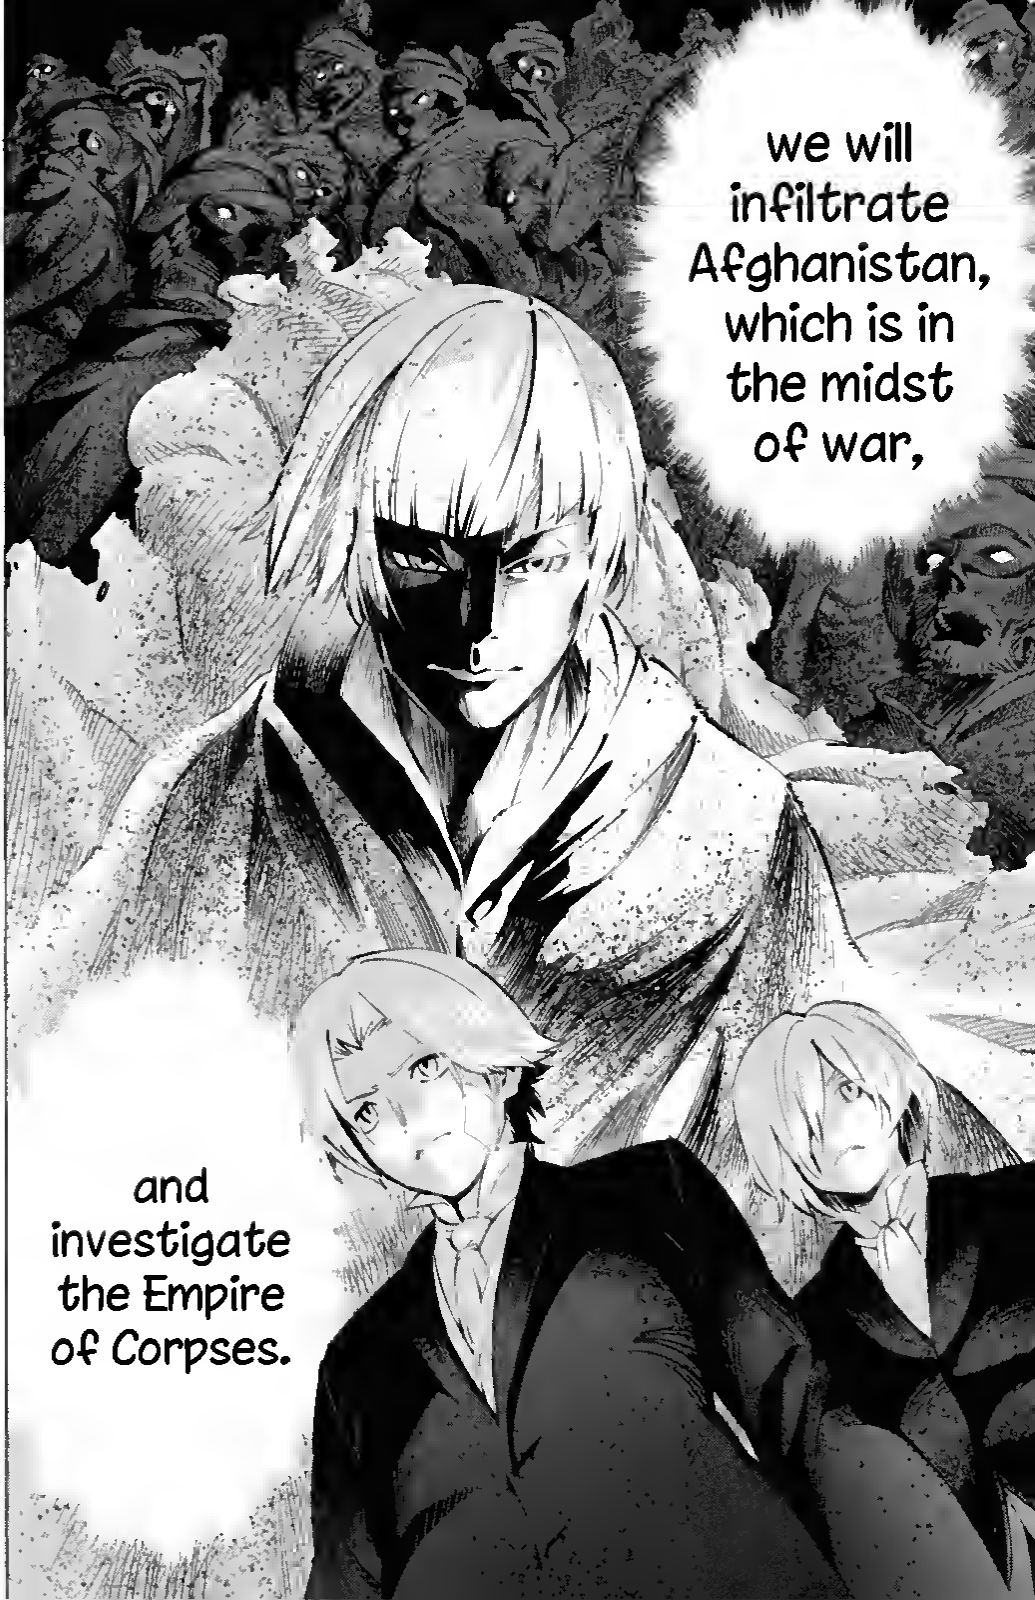
If you hurt yourself while protecting a friend, then that's a scar worth having.
...And Captain, you're the same.
you city-dwelling noble.
I have never had any in my life,
Wa../? Don't you have any emotions?
Whether alive or dead.
If it were me, I'd kill the enemy along with my friend.
Mr. Watson and Friday.
Alright, alright, let's take it easy,
.....
ドカ

This person is?
Alexei Karamazov.
The corpse professor from Russia!?
He's our century's Frankenstein equivalent!
So you knew the name.

this genius is?
And...
He vanished deep in the lands of Afghanistan,
together with a squad of armed corpses.
What does he plan to do..?

According to M, he wants to create a Corpse Kingdom.
!?

Here's the official order. From here on out,
And so, Watson, you, a pro at corpse technology, got called in.
I am a pro at fighting, but I don't understand corpses.



we will infiltrate Afghanistan, which is in the midst of war,
and investigate the Empire of Corpses.
